SUMMER ASSISTANT

I am very interested in giving back what I have learnt to younger children. For example, at my Martial Arts Center, I have helped train several new and younger students who needed assistance in learning or improving their martial art's skills, techniques, and the many other aspects of the martial art, such as discipline and responsibility.

EXPERIENCE AND ACCOMPLISHMENTS**Problem Solving Skills**

- Self-learnt and solved Rubik's Cube puzzle and taught my younger brother. I assisted him to overcome and master the challenge.
- High school robotic prototyping. I contributed ideas and helped the team accomplish some of the goals. I helped to come up with an idea for one of the most notable challenges our team had to face, to efficiently lift the crates with precision as well as moving the robot with speed. I also helped design and build the prototype that allowed our ideas to be functional.

Persistence Skills

- I have been in the school band for last six years. I have been of this program through 4th and 5th grade in elementary school, all through middle school, and I am still continuing in high school, as well as being a part of the Lynbrook Marching Band. I really enjoy this activity and look forward to continuing through the rest of high school.
- Learning Indian Classical Music since I was 6 years old, and am very interested as well. I have performed in several competitions and have received a third place prize in a local Bay Area Indian Classical Music competition.
- I have been playing soccer for the last 3 years and I have really enjoyed the sport. I was very motivated to work hard and improve my soccer skills and techniques to achieve my main goal, to make the school soccer team. Even though I was cut during the tryout, it has given me even more drive to accomplish this goal the following year and many years to come.

Computer skills

- Very proficient in Microsoft Office application (Word, Excel, Power point)
